

S'WONDERFUL!

BY LAURA BARNETT SAWCHYN, IIDA

PHOTOGRAPHS: MANUFACTURERS
REALIZATION: SKREBNESKI

Light up your life with this beautiful faucet from KWC. No need to get wet to test the water temperature; the light shines red for hot and blue for cold. Available at Abt

Technology has changed the role of the kitchen to that of a command center. Captain Kirk meets the Jetsons as new appliances do much of the work at the touch of a button or a call from your cell phone. Televisions are built into refrigerators or oven hoods. There's even an oven that refrigerates your food up to twenty-four hours before it cooks it, and then keeps it warm until you return home from work. Take out of micro-by scanning UPC code before placing the food in program the time automatically. There are dishwashers that sense just how dirty your dishes really are and magically adjust the amount of soap, water temperature, intensity, and running time accordingly. Stainless steel glistens everywhere. Even if your favorite thing to make for dinner is a restaurant reservation, consider these elements to bring your kitchen into the 21st Century.

(Above) It's easy to make cappuccino for him and espresso for yourself with this spectacular built-in coffee maker from Miele, Neff Of Chicago.

(Opposite page) There are many cooktops with heating elements that fluctuate: some even turn themselves off. But none do it as beautifully as Fisher & Paykel.

Cooking centers developed by NEFF Chicago are spacious enough for the whole family to

participate. This sleek island is made of exotic wood combined with ash and stainless steel. Large drawer base cabinets are constructed of heavy duty stainless steel.

Available at Neff of Chicago
